

K Love radio is heard in my area out of Elgin Illinois. This is one of the most uplifting radio stations that can be heard in this area. If the FCC were to do anything about KLOVE I would ask that you boost their signal so that I can receive it CLEARLY not in and out as i do when i listen to it. KLOVE has been an inspiration to my family and to families that listen to it. children can listen with no fear from the parents that they are hearing bad things like other radio stations might play. Please keep KLOVE where it is at and BOOST its signal so it reaches more and more families.

Thank you
